

It is said that the silver mines of Iwami Ginzan were discovered by a high-rank samurai as he was sailing the Sea of Japan. Looking at the mountains along the coastlines he saw silver glowing against the sun, which led to the silver rush and soon the creation of marine routes bringing the local silver across Japan from these shores.

With this tour, you will be going through the same process, approaching Iwami Ginzan from its coastlines and “rediscovering” its silver.

While explaining the area’s history, the local guide will also show the beauty of Kotogahama beach, including its rather unique “singing sands”. If the weather is fine and waves are lower than 1m, an optional boat ride along the coasts is also available.

Precautions against the spread of Covid19 infection:

Small group of maximum 4 participants, social distancing during tour.
